SUBJECT INDEX

Canadian Journal of Soil Science, Volume 66, 1986

Acetylene reduction
  seed-applied fungicides and N_2 fixation, 143
Acid fertilizers
  uptake of N and P from acid fertilizers, 189
Acid soils
  lime requirement by SMP buffer methods, 373
Adenosine triphosphate
  excess manure in soil, 303
Adsorption and release of phosphate in soil, 521
Aluminum
  influence of phosphate ions on Al extraction, 573
  hydrolytic products of, 573
Amelioration
  subsoiling effects on a Solonetzic soil, 437
Ammonia-soil interaction
  fate of nitrogen added to several soils, 661
Ammonium nitrate
  barley yield affected by fertilizer form and addition method, 615
  gypsum amendment of an irrigated solonetzic soil, 581
  mineralization and loss of soil N, 397
Amphotericin B
  forest soil microbes and biocides, 261
Andic brown soils
  soils on basic parent materials in France and Quebec, 177
Andosols
  soils on basic parent materials in France and Quebec, 177
Anhydrous ammonia
  barley yield affected by fertilizer form and addition method, 615
Apple (Bisbee Delicious)
  orchard soil management and soil temperature, 701
Autoanalyzer
  determining oxalate Si in soils, 751

Banding
  irrigation and NPK placement for tomato production, 653
Barley
  effect of tillage method on soil structure and crop yield, 385
Barley seedings
  humus and nitrate assimilation, 731
Bean (field)
  seed-applied fungicides and N_2 fixation, 143
Biomass
  biomass and soluble C in Breton loam, 1
Black chernozem
  vegetation and management effects on, 73
Black plastic mulching
  orchard soil management and soil temperature, 701
Boron (hot water extractable), 377
Boron toxicity
  effect of Zn and B on tobacco, 67
Breton plots
  biomass and soluble C in Breton loam, 1
Broadcast
  broadcast and residual P vs. seed-placed P, 237
  irrigation and NPK placement for tomato production, 653
Bulk density
  monolith columns for organic soils, 737
  neutron probe calibration, 173

Calcite
  lime movement in soil columns, 757
Calibration
  neutron probe calibration, 173
Canada Soil Survey Committee
  reference soil samples, 377
Captan
  seed-applied fungicides and N_2 fixation, 143
Carbon
  biomass and soluble C in Breton loam, 1
  carbon and nitrogen by LECO CHN-600, 543
CEC
  décomposition des matières ligneuses dans le sol, 623
Cesium-137
  assessing soil erosion in Saskatchewan with Cesium-137, 591
Chernozem
  adsorption and release of phosphate in soil, 521
  form of residual fertilizer P in, 105
Chloroform
  forest soil microbes and biocides, 261
Cold stress
  potash on winter rye cover, 31
Compaction
  matière organique et masse volumique apparente, 743

Computer mapping of irrigation water requirement, 471
Continuous cropping
changes in soil nitrate profiles over winter, 537
Corn
changes in soil nitrate profiles over winter, 537
corn growth with restricted nodal roots, 689
corn yield trends in Ontario, 481
manure N availability to field corn, 713
soil disturbance and P absorbtion by corn, 287
soil water and temperature on early corn root growth, 51
variability in soil properties, 747
Critical K concentration
potash on winter rye cover, 31
Crop rotations
biomass and soluble C in Breton loam, 1
Cropland expansion
corn yield trends in Ontario, 481

Data basis
corn yield trends in Ontario, 481
Décomposition des matières ligneuses dans le sol, 623
Deep ripping
Solonetzic soil amelioration: S, tillage and irrigation, 347
Degradation
microbial response and degradation to sethoxydim, 411
Degree days
orchard soil management and soil temperature, 701
Denitrification
effect of sulfide on denitrifying bacteria, 633
overwinter fertilizer N losses, 513
Deposition
soil redistribution in New Brunswick, 721
Direct-drilling Italian ryegrass and soil structure, 197
Direct-planted corn
variability in soil properties, 747
Dolomite
lime movement in soil columns, 757
Drainable porosity
hydraulic conductivity and drainable porosity, 249
Dystric Brunisols
pedogenic imogolite in Brunisols, 135

Early spring loss
mineralization and loss of soil N, 397
Ecology (microbial)
forest soil microbes and biocides, 261
Electrical resistance
rapid method for estimating soil salinity, 315
Elemental S
sulfur fertilizers, 91
Erodible aggregates
fall tillage for spring wheat in a Black Chernozem, 159
Erosion
assessing soil erosion in Saskatchewan with Cesium-137, 591
soil redistribution in New Brunswick, 721

Fall application of N
fall and spring application of nitrogen fertilizers, 225
Feedlot manure
excess manure in soil, 303
Fertilizer
overwinter fertilizer N losses, 513
Fertilizer nitrogen
effect of tillage method on soil structure and crop yield, 385
Fiber content
monolith columns for organic soils, 737
Field bean
temperature and N_2 fixation, 217
Foliar-applied Mn
manganese in cereals and forages, 59
Frozen soil
mineralization and loss of soil N, 397

Gleying
Gleysolic order criteria, 323
Grain protein
fall tillage for spring wheat in a Black Chernozem, 159
Green manure
restoring eroded land, 273
Ground cover
orchard soil management and soil temperature, 701
Groundwater flow surrounding a recharge slough, 121
Growth regulator
corn growth with restricted nodal roots, 689
Gypsum
gypsum amendment of an irrigated Solonetzic soil, 581
lime movement in soil columns, 757
Gyttja
sulphur fractions in peat materials, 337

Heavy metals
leaching of metals from sewage sludge: pH effects, 763
High performance liquid chromatography
analysis of nitrate in soils, 151
Hillslope
assessing soil erosion in Saskatchewan with Cesium-137, 591
Holocene soil
influence of topography on Paleosol formation, 673
Humic fractions
humus and nitrate assimilation, 731
Humic substances
effect of manure on soil properties, 601
Humification
décomposition des matières ligneuses dans le sol, 623
Humisols
aluminum speciation in soil extracts, 367
Hydraulic conductivity
evaluations for soil conditioners, 45
hydraulic conductivity and drainable porosity, 249
soil drainage interpretation, 37
8-Hydroxyquinoline
influence of phosphate on Al extraction, 573
Immobilisation
Décomposition des matières ligneuses dans le sol, 623

Inhibition
microbial response and degradation to sethoxydim, 411
spatial heterogeneity of urea, 499
Iron
gleysolic order criteria, 323
Iron reduction
effect of sulfide on denitrifying bacteria, 633
Irrigation
computer mapping of irrigation water requirement, 471
gypsum amendment of an irrigated Solonetzic soil, 581
irrigation and NPK placement for tomato production, 653
Solonetzic soil amelioration: S, tillage and irrigation, 347
subsoiling effects on a Solonetzic soil, 437
Italian ryegrass
direct-drilled Italian ryegrass and soil structure, 197

Kinetics
spatial heterogeneity of urea, 499

Land information
corn yields trends in Ontario, 481
Land tenure
tenure and soil productivity, 357
Landscape position
influence of topography on Paleosol formation, 673
Leaching
drain depth and salinity control, 531
leaching of metals from sewage sludge: pH effects, 763
Leaf, nutrition of
orchard soil management and soil temperature, 701
Lignosulphonate
effectiveness of Zn fertilizer sources, 183
Lime
gypsum amendment of an irrigated Solonetzic soil, 581
lime movement in soil columns, 757
lime requirement by SMP buffer methods, 373
Litterfall
nutrient cycling and availability, 547
Lodgepole pine soil
forest soil microbes and biocides, 261
Luvisol
biomass and soluble C in Breton loam, 1

Manganese
gleysolic order criteria, 323
Manure (green)
restoring eroded land, 273
Manure N
availability of to field corn, 713
Masse volumique
matière organique et masse volumique apparente, 743
Matière organique
décomposition des matières ligneuses dans le sol, 623
matière organique et masse volumique apparante, 743
Matières ligneuses
décomposition des matières ligneuses dans le sol, 623
Mesocotyl
corn growth with restricted nodal roots, 689
Metal leaching
leaching of metals from sewage sludge: pH effects, 763
Michaelis-Menten
spatial heterogeneity of urea, 499
Microbial biomass
variability in soil properties, 747

Microbial ecology
forest soil microbes and biocides, 261
Micromorphology
Gleysolic order criteria, 323
Microorganisms
microbial response and degradation to sethoxydim, 411
Mineral N (see Nitrogen)
Mineralization
nutrient cycling and availability, 547
Monoammonium phosphate
uptake of N and P from acid fertilizers, 189
Monolith columns for organic soils, 737
Monosaccharides
excess manure in soil, 303
Mycorrhizae
soil disturbance and P absorption by corn, 287

Nest placement
spatial heterogeneity of urea, 499
Net N mineralization
effect of manure on soil properties, 601
Neutron probe
calibration of, 173
Nitrate N
changes in soil nitrate profiles over winter, 537
HPLC analysis of nitrate in soils, 151
mineralization and loss of soil N, 397
humus and nitrate assimilation, 731
Nitrification
spatial heterogeneity of urea, 499
Nitrogen
barley yield affected by fertilizer form and addition method, 615
carbon and nitrogen by LECO CHN-600, 543
fall and spring application of nitrogen fertilizers, 225
mineralization and loss of soil N, 397
mineralization, forest soil microbes and biocides, 261
nutrient cycling and availability, 547
overwinter fertilizer N losses, 513
uptake of N and P from acid fertilizers, 189
Nitrogen (atmospheric)
seed-applied fungicides and N_2 fixation, 143
temperature and N_2 fixation, 217
Nitrogen availability
fate of nitrogen added to several soils, 661
Nitrogen fertilizer
corn yield trends in Ontario, 481
fall and spring application of, 225
Nitrogen-15
effect of manure on soil properties, 601
isotope dilution, 143
seed-applied fungicides and N_2 fixation, 143
Nitrous oxide reduction
effect on sulfide on denitrifying bacteria, 633
No-till
soil disturbance and P absorption by corn, 287
Northern soils
effect of tillage method on soil structure and crop yield, 385
Nutrition (leaf)
orchard soil management and soil temperature, 701

Orchard soils
soil Zn fractions, 445
Organic matter
biomass and soluble C in Breton loam, 1
excess manure in soil, 303
Organic matter change
fall tillage for spring wheat in a Black Chernozem, 159
Organic soil
monolith columns for, 737
Oxalate Si
determining oxalate Si in soils, 751

Paleosol
influence of topography on Paleosol formation, 673
Peat
sulphur fractions in peat materials, 337
Pedogenic imogolite
pedogenic imogolite in Brunisols, 135
Pedon classification
soil variability and taxonomy, 21
Pesticide effects
forest soil microbes and biocides, 261
pH du sol
effet du pH et de l'humidité des sols sur la résponse au molybdène, 421
pH × exchangeable Zn interaction
soil Zn fractions, 445
Phaseolus vulgaris L. (see Bean (field))
Phosphate
adsorption and release of phosphate in soil, 521
influence of phosphate ions on Al extraction, 573
Phosphorus
broadcast and residual P vs. seed-placed P, 237
excess manure in soil, 303
form of residual fertilizer P in Chernozemic soils, 105
nutrient cycling and availability, 547

uptake of N and P from acid fertilizers, 189
soil disturbance and P absorbtion by corn, 287
Phosphorus efficiency
irrigation and NPK placement for tomato production, 653
Plant (N:S)P ratio
sulphur response requirements of alfalfa, rape and barley, 209
Plant uptake of N
sulphur response requirements of alfalfa, rape and barley, 209
Plant uptake of S
sulphur response requirements of alfalfa, rape and barley, 209
Plant-available S
sulphur response requirements of alfalfa, rape and barley, 209
Podzol
aluminium speciation in soil extracts, 367
determining oxalate Si in soils, 751
soils on basic parent materials in France and Quebec, 177
soil variability and taxonomy, 21
Potassium concentration
potash on winter rye cover, 31
Pothole
groundwater flow surrounding a recharge slough, 121
Precipitation
restoring eroded land, 273
Precision
carbon and nitrogen by LECO CHN-600, 543
Proto-imogolite allophane
pedogenic imogolite in Brunisols, 135

Rate of analysis
carbon and nitrogen by LECO CHN-600, 543
Recharge
groundwater flow surrounding a recharge slough, 121
Reclamation
drain depth and salinity control, 531
Reduction
gleysolic order criteria, 323
Régimes hydriques
effet du pH et de l'humidité des sols sur la réponse au molybdène, 421
Rental contract
tenure and soil productivity, 357
Respiration
microbial response and degradation to sethoxydim, 411
Retention
changes in soil nitrate profiles over winter, 537
Rhizobium leguminosarum biovar *phaseoli*
temperature and N_2 fixation, 217
Rhizobium phaseoli
seed-applied fungicides and N_2 fixation, 143
Root growth (early)
soil water and temperature on early corn root growth, 51

Salinity
subsoiling effects on a Solonetzic soil, 437
Sampling patterns
spatial variability of sand, 641
Sand content
spatial variability of sand, 641
Saturated hydraulic conductivity
monolith columns for organic soils, 737
Scanning electron microscopy-energy dispersive X-ray analysis Gleysolic order criteria, 323
Seed-placed P
broadcast and residual P vs. seed-placed P, 237
Seminal roots
corn growth with restricted nodal roots, 689
Sethoxydim
microbial response and degradation to sethoxydim, 411
Sewage sludge
leaching of metals from sewage sludge: pH effects, 763
Shoemaker-McLean-Pratt
lime requirement by SMP buffer methods, 373
Slough
groundwater flow surrounding a recharge slough, 121
Sodic soil
gypsum amendment of an irrigated Solonetzic soil, 581
Soil
Aluminum speciation in soil extracts, 367
assessing soil erosion in Saskatchewan with cesium-137, 591
carbon and nitrogen by LECO CHN-60
classification of, on basic parent materials in France and Quebec, 177
drain depth and salinity control, 531
drainage interpretation, 37
effect of manure on soil properties, 601
effect of tillage method on soil structure and crop yield, 385
fall tillage for spring wheat in a Black Chernozem, 159
HPLC analysis of nitrate in soils, 151
influence of topography on Paleosol formation, 673

leaching of metals from sewage sludge; pH effects, 763
manganese in cereals and forages, 59
rapid method for estimating soil salinity, 315
redistribution of soil in New Brunswick, 721
restoring eroded land, 273
spatial variability of sand, 641
sulphur response requirements of alfalfa, rape and barley, 209
tenure and soil productivity, 357
variability and taxonomy, 21
variability in soil properties, 747
vegetation and management effects on Black Chernozems, 73
water and temperature on early corn root growth, 51
zinc fractions, 445
Soil biological properties
direct drilled Italian ryegrass and soil structure, 197
effect of manure on soil properties, 601
Soil physical properties
aggregation, cloddiness; tillage and amendments on two Solonetzic soils, 455
direct drilled Italian ryegrass and soil structure, 197
effect of tillage method on soil structure and crop yield, 385
evaluations for soil conditioners, 45
Soil samples (CSSC reference)
hot water extractable boron, 377
Sodicity
subsoiling effects on a Solonetzic soil, 437
Sodium adsorption ratio
tillage and amendments on two Solonetzic soils, 455
Sodium sulfate, thiosulfate
sulfur fertilizers, 91
Solod
adsorption and release of phosphate in soil, 521
Solonetzic soil
gypsum amendment of an irrigated Solonetzic soil, 581
Solonetzic soil amelioration: S, tillage and irrigation, 347
Solonetzic soils
tillage and amendments on two Solonetzic soils, 455
Sorptivity
evaluations for soil conditioners, 45
Spatial distribution
spatial variability of sand, 641
Spatial variability
subsoiling effects on a Solonetzic soil, 437
variability in soil properties, 747
Spent sulphite liquor
effectiveness of Zn fertilizer sources, 183
Spodosols
pedogenic imogolite in Brunisols, 135
Spring application of N
fall and spring application of nitrogen fertilizers, 225
Stemflow
nutrient cycling and availability, 547
Streptomycin
forest soil microbes and biocides, 261
Stress (cold)
potash on winter rye cover, 31
Subsurface drainage
drain depth and salinity control, 531
hydraulic conductivity and drainable porosity, 249
Sulfide
effect of sulfide on denitrifying bacteria, 633
Sulfur (sulphur)
Solonetzic soil amelioration: S, tillage and irrigation, 347
sulfur fertilizers, 91
sulphur fractions in peat materials, 337
Sulphite pulping
effectiveness of Zn fertilizer sources, 183
Suppression
orchard soil management and soil temperature, 701

Tenancy
tenure and soil productivity, 357
Teneur en Mo de la luzerne
effet du pH et de l'humidité des sols sur la réponse au molybdène, 421
Teneur en Mo du sol
effet du pH et de l'humidité des sols sur la réponse au molybdène, 421
Texture
neutron probe calibration, 173
soil drainage interpretation, 37
Thiobacillus thioparus
Solonetzic soil amelioration: S, tillage and irrigation, 347
Throughfall
nutrient cycling and availability, 547
Tile drainage
soil drainage interpretation, 37
Tillage
direct-drilled Italian ryegrass and soil structure, 197
effect of tillage method on soil structure and crop yield, 385

fall tillage for spring wheat in a Black Chernozem, 159
Solonetzic soil amelioration: S, tillage and irrigation, 347
Tissue
effect of Zn and B on tobacco, 67
manganese in cereals and forages, 59
Tobacco yields
effect of Zn and B on tobacco, 67
Tomato
irrigation and NPK placement for tomato production, 653
Topsoil loss
restoring eroded land, 273
Transient flow
groundwater flow surrounding a recharge slough, 121

Universal soil loss equation
soil redistribution in New Brunswick, 721
Urea
barley yield affected by fertilizer form and addition method, 615
fall and spring application of nitrogen fertilizer, 225
overwinter fertilizer N losses, 513
spatial heterogeneity of urea, 499
Urea phosphate
uptake of N and P from acid fertilizers, 189

Water-stable aggregates
restoring eroded land, 273
Weather variability
corn yield trends in Ontario, 481
Winter ground cover
potash on winter rye cover, 31

Xylem resistance
corn growth with restricted nodal roots, 689

Yield response
barley yield affected by fertilizer form and addition method, 615

Zea mays L. (see Corn)
Zeolite
adsorption and release of phosphate in soil, 521
Zinc
effect of Zn and B on tobacco, 67
effectiveness of Zn fertilizer sources, 183
soil Zn fractions, 445
